B. DHCD – HUD Manufactured Housing Updates:

The Board reviewed and adopted the recommendations of the Committee with regards to the new HUD requirements for manufactured housing installation. Representatives from the Manufactured Housing Board (housed at DHCD) assisted in educating the Board on the new requirements and suggested that the two boards work together to jointly meet HUD's mandate. DHCD will be responsible for the development and monitoring of the individual certification program and the Board for Contractors, through its current licensing program, will ensure that the Qualified Individuals of Contractors licensed to install manufactured homes, have completed the required training and have been certified by DHCD.

C. Changes to the Plumbing Code (Fire Sprinklers):

The Board reviewed and adopted the recommendations of the Committee with regards to regulatory changes that should be made in anticipation to upcoming changes to the USBC that would provide fire sprinkler coverage to single family homes. On a national level the new residential codes will mandate fire sprinkler coverage in new residential construction; however, representatives from the Virginia Building and Code Officials Association (VBCOA) anticipate that Virginia, while adopting the installation requirements, will not make it mandatory. In any event, the changes will also allow the installation of such systems to be performed by plumbers. The Committee is concerned that the vast majority of the nearly 10,000 licensed journeyman and master plumbers will not have received adequate training to start installing such systems. The Board, as part of its current regulatory package, will propose a special fire sprinkler endorsement to the individual plumbing licensing criteria, which will include additional training requirements. The Board will also formally request that the Department of Labor and Industry (DOLI) review the current plumbing apprenticeship education curricula to ensure that residential fire sprinkler installation be added and required of all programs.

D. Regulatory Review:

The Board review staff and Committee recommendations for regulatory changes. Other recommendations will be presented to the Board for review and discussion during the Board's next scheduled meeting on January 27, 2009.
